

Please note that, unless you are connected to the university network (not eduroam), an active VPN-connection is required to connect to a network drive.

Mapping a Network Drive on Linux Devices Running on UBUNTU

To connect your Linux device to a network drive, open your Device's file explorer and select the Option „**Other Locations**“ from the menu on the left.

In the next window, type in the following path in the bar next to „**Connect to Server**“ and confirm with „**Connect**“:

smb://filer.uni-siegen.de/NAS

Lastly, provide your ZIMT username and password. For domain, type in the following:
uni-siegen.de

Cancel Connect

Anmeldung erforderlich

Bitte geben Sie Benutzer und Passwort für die Freigabe »nas« auf »filer.uni-siegen.de« ein:

Connect As Anonymous
 Registered User

Username

Domain **uni-siegen.de**

Password

Forget password immediately
 Remember password until you logout
 Remember forever

Confirm with „**Connect**“. The drive can now be found under your directories.
